Lesion analysis on BraTS2018 (corrected, within-body AUROC): the trust map is blind to the tumor --- a confidently-wrong hallucination

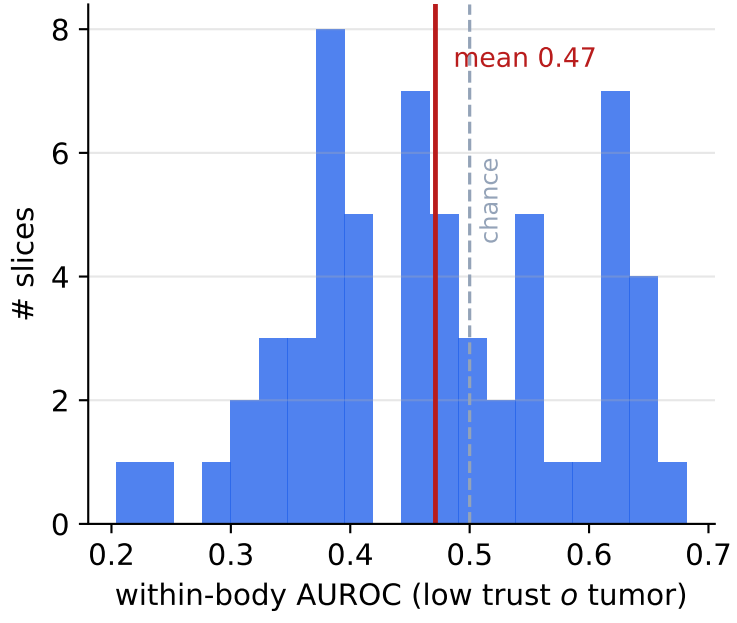

(a) Trust: inside vs outside tumor

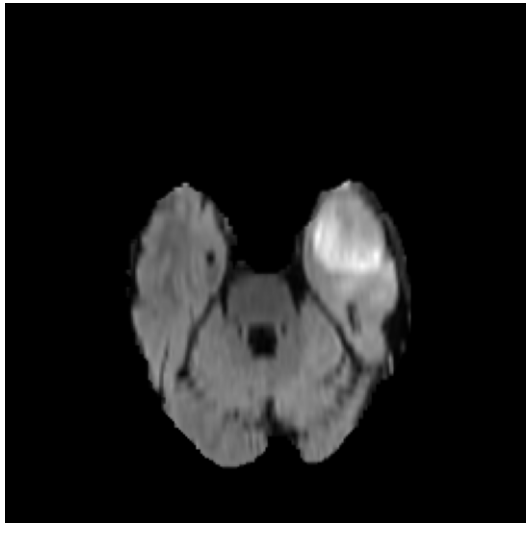

(b) Error: 1.60*imes* inside (90% of slices)

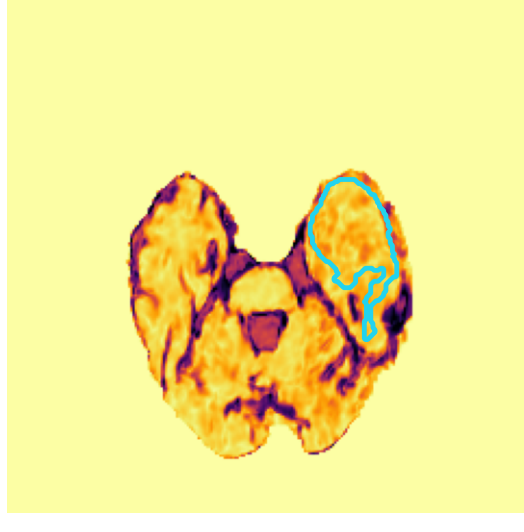

(c) Trust map carries NO tumor information

FLAIR source (tumor bright, right)

Trust map + tumor contour:
tumor is HIGH-trust (confidently wrong)

Translated T2 (smooth fill of tumor)
